YARNS & COLORS INTERNATIONAL CO., LTD.

## YARNS & COLORS INTERNATIONAL CO., LTD.

YARNS&COLORS集團推出了最先進的針織設計生產中心，擁有尖端日本SHIMA SEIKI 3D自動化控制及自動精密編織針織。提供多樣化的設計平台，涵蓋全面的一站式服務，包括專業的設計方案、設計規劃、3D設計模擬、打樣、生產和銷售。

同時，意創坊也在實踐大學創立專業人才培育中心，透過產學合作的方式，為台灣培養具備國際最新專業技術的設計編程人才，成為接軌國際時尚舞台的橋樑。此外在2018年10月真正落實數位設計與智能化、自動化生產無縫接軌。

意創坊擁有豐富的國際通路以及市場資源，藉由義大利辦事處獲得最新流行資訊，結合YARNS&COLRS集團豐富的花式紗線，為全球客戶提供高效、環保且高品質的針織產品。

YARNS&COLORS Group has launched the most advanced knitting design and production center, featuring cutting-edge SHIMA SEIKI 3D automated control and precision knitting from Japan. It offers a diverse design platform and provides a comprehensive one-stop service, including professional design solutions, design planning, 3D design simulation, prototyping, production, and sales.

In addition, YCI (Creative Workshop) has established a professional talent cultivation center at Shih Chien University. Through industry-academia collaboration, the center nurtures Taiwanese design and programming talent equipped with the latest international professional techniques, serving as a bridge to connect Taiwan with the global fashion stage. Moreover, in October 2018, it successfully realized the seamless integration of digital design with intelligent and automated production.

YCI also boasts extensive international channels and market resources. Through its Italian office, it obtains the latest fashion information and, by leveraging the rich fancy yarns of the YARNS&COLORS Group, provides global customers with high-efficiency, eco-friendly, and high-quality knitted products.

什麼是3DKnit？3DKnit註冊商標是意創坊擁有的專業無縫針織技術及永續發展的專利保證。

3DKnit使用一體成型無縫針織技術，結合專業編程設計的導入，由一根紗線進行編織，下機即為一件完整的針織服裝。

紡織行業為僅次於石油的全球第二大污染產業，高占比的廢水和碳排放量，3DKnit產品由一體成型無縫針織機台織造，源自於日本一雙手套的革新技術，全自動化生產，僅需人工提前設定參數。

一般針織服裝的織造過程是先分別編織前身、後身、左右袖及衣領後進行縫合，而意創坊所使用的一體成型機台是先繪製編織工藝之後，將編織程式傳送到一體成型機台，再由專業人員進行紗線作業及參數設定，機器會根據編織程式進行全自動化的編織，其編織過程不需進行任何剪裁及縫合。

3DKnit不僅代表的是一個革新技術，同時也因生產工序的突破，生產過程中幾乎零廢料產生，意創坊跟隨母公司錦祥集團對環境保護及永續發展的堅持，致力於改善並降低紡織產業的污染產生，進而達到地球永續發展及企業社會責任的承諾。

What is 3DKnit? 3DKnit registered trademark is the patent guarantee of professional seamless knitting technology and sustainable development owned by Yarns & Colors International Co., LTD.

The best in innovative knitting technology, 3D knit combines its knitting technology and programming design to knit a completed garment.

3DKnit specializes in sustainable development by reducing pollution and eliminating wasted energy.

## 3DKnit

由專業的編程設計製圖到完成一件衣服，無縫接軌，傳統的針織服裝經剪裁縫製而成，而3DKnit的智無全自動化編織，在生產工序上技術革新的突破，減少並降低紡織產業的污染，對環境及永續發展做出巨大貢獻。  
3DKnit is one of the best in innovative knitting technology. It combines professional programming design with seamless knitting to create knitted wear in one piece. While reducing pollution and waste generation in the textile industry, 3DKnit continues to make great contributions towards environmental protection and sustainable development.

-  **AI PRODUCTION**  
智能生產
-  **ACCELERATED DELIVERY PERIOD**  
加速交期
-  **MINIMAL USE OF RAW MATERIALS**  
最低限度使用原料
-  **RECYCLABLE SEAMLESS KNITWEAR**  
無縫針織可回收
-  **REDUCING CARBON DIOXIDE EMISSIONS**  
減少二氧化碳排放量
-  **WASTE-FREE 3D KNIT PRODUCTION**  
減少紡織廢棄物
